Areas of specialisation

Research interest: I am drawn to simplicity, strive to understand things deeply, and enjoy building practical systems. Currently, I am fascinated by **multi-modal** foundation models like GPT-4o and CLIP, which can be adapted to a wide range of downstream tasks. My focus is on understanding how these models work, and improving their reasoning ability and robustness with **self-questioning**, **preference optimization** and **evidential knowledge**.
Topics: General-purpose Vision-Language Understanding, Evidential Learning
Skills: Python, PyTorch, C++
